

ABOUT NEP-2020

This National Education Policy (NEP) 2020 is the first education policy of the 21st century and aims to address many growing developmental imperatives of our country. This Policy proposes the revision and revamping of all aspects of the education structure, including its regulation and governance, to create a new education system that is aligned with the aspirational goals of the 21st century education, including Sustainable Development Goal 4, while building upon India's traditions and value systems. The National Education Policy 2020 lays a particular emphasis on the development of the creative potential of each individual. It is based on the principle that education must develop not only cognitive capacities but both the 'foundational capacities' of literacy and numeracy and 'higher-order' cognitive capacities, such as problem solving and critical thinking – in addition to social, ethical, and emotional capacities and dispositions.

The NEP aims to make it easier to set up new quality of higher educational institutes which will be at par with the global standards. One of the key transformations that NEP has brought is the introduction of a single point regulator of Higher Education that would take care of all the functions of higher education – HECI or the Higher Education Commission of India. You can say that it is a one-stop solution for all the needs of higher education institutions! This Seminar unveils the Reforms of NEP 2020 For NAAC, UGC, And AICTE.
