

ENGINEERING WORK SHOP

Engineering Workshop practice facility will enable the students of various streams of engineering to gain basic knowledge regarding operations done practically using various hand tools and machines to transform raw material into final product/ The various basic operations carried out are:

- Carpentry
- Fitting
- Tin Smithy
- Welding
- House Wiring
- Foundry
- Plumbing

S.No	Name of major equipments	Photo/Image
1.	<i>Carpentry Section Tools and Equipments</i>	 A photograph of a carpenter's workbench. The workbench is made of light-colored wood and has a dark, possibly metal or wood, surface. On the workbench, there are several tools: a hammer with a wooden handle, a chisel with a white handle, a saw with a wooden handle, and a square. There are also some pieces of wood and a blue container on the workbench. The background is a plain wall.
