

Department of ME	
B.Tech - II-Year	
CO	Subject Name -CO Statements
C206: Production Technology Lab	
CO#	# Student will be able to
C206.1	Student will be able to Comprehend the different basic pattern designs and produce defect free casting products.
C206.2	Student will be able to Prepare and test different sand mixtures and properties for correction factors in various moulding sands to achieve required strengths and permeability.
C206.3	Student will be able to Understand the working and use of different welding machines depending upon the specific purpose.
C206.4	Student will be able to Comprehend and state the use of different mechanical presses and their working.
C206.5	Student will be able to Analyze and perform the injection and blow moulding processes.
C206.6	Student will be able to Select suitable approach and manufacturing process for solving an engineering problem at minimum cost.
