

Department of ME	
B.Tech - II-Year	
CO	Subject Name -CO Statements
C207:Machine Drawing Practice	
CO#	# Student will be able to
C207.1	Student will be able to Use convention symbols for the representation of materials, common machine elements and parts used in machine drawing.
C207.2	Student will be able to Implement methods of dimensioning, selection of section planes and drawing of sections and auxiliary sectional views.
C207.3	Student will be able to Develop primary knowledge of working drawings of machine elements.
C207.4	Student will be able to Draw the different types of screw threads and apply in different engineering applications.
C207.5	Student will be able to Draw the orthographic views of machine elements including keys, couplings, cotters, riveted joints, different types of bearings.
C207.6	Student will be able to Develop an assembly drawing using part drawings of machine components.
